

What on EARTH is in your MP3 Player and WHERE on EARTH does it come from?

Who knew one little MP3 Player contained all these Earth resources, and more?

- Aluminum
- Carbon
- Cobalt
- Copper
- Indium
- Iron
- Lithium
- Plastic (Petroleum products)
- Silver
- Tin

WHERE on EARTH does this stuff come from?

- Canada has the world's largest reserves of indium. Indium is a by-product of zinc smelting.
- Canada is one of more than 77 countries around the world that produce raw petroleum.
- Chile is the world's leading producer of lithium and copper.
- China is the world's largest producer of tin, iron and aluminum.
- Canada is the world's fifth largest producer of iron with mines in northern Quebec and Labrador.
- Peru is the world's biggest silver producer and Canada is the world's ninth.
- The world's largest silver mine is the Cannington mine located in Queensland, Australia.
- The world's largest producer of cobalt is the Democratic Republic of the Congo in Africa.
- South Korea is the world's largest producer of elemental carbon from the mineral graphite.
