

MOM! DAD!

WHERE DO

SODA CANS COME

FROM!?!?

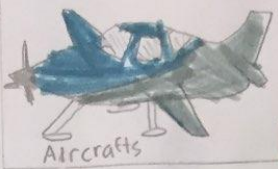

by: Alexa Calderon

12 Aluminum has a lot of uses. When it's combined with other metals it becomes stronger than its pure form. This is called alloy.

13 Alloy is used to make...
Aircrafts and boats

14
Wah how are you guys doing that?

15 Most aluminum cans are manufactured in the United States.

19
We learnt a lot...

16
And then shipped to different countries.

20
Thanks

17
And that's how we were made.

no problem

18
WOW...

21
THE
END!
